FIWARE ACCELERATOR PROGRAMME OPEN CALLS!

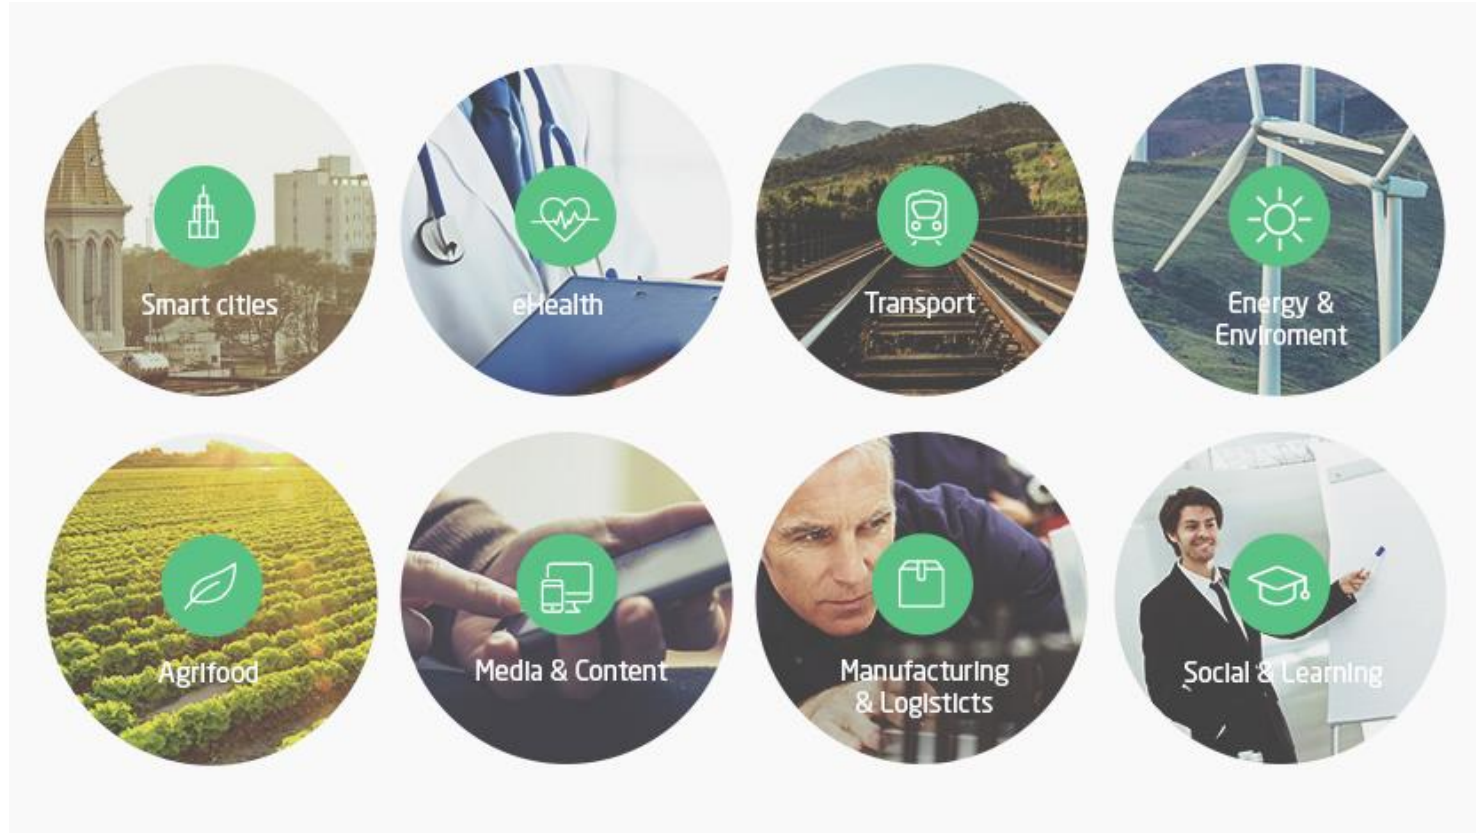

APPLY NOW

The Future Internet Public-Private Partnership (FI-PPP)

- The aim of the FI-PPP is **to place Europe in the best position to capture new opportunities in the Future Internet**, derived from digitalization of economy sectors
- This requires creating **an generic, open and standard platform (FIWARE)** and **meeting point (FILAB)** around which a dynamic innovation ecosystem can be created engaging developers and entrepreneurs

FIWARE Accelerator Projects

FICHe

Future Internet Challenge eHealth

Future Internet CHallenge eHealth

- One of the **accelerator projects** supported by the Future Internet program and targeted to **the successful deployment of FIWARE technology** with the aim to create successful businesses throughout Europe
- To accelerate **SMEs and startups** that develop **innovative applications in the eHealth** domain
- SMEs will translate their idea into **a field lab tested prototype**, while elaborating their **business plan** and **go-to-market strategy**

Value Proposition

- Accelerate **SMEs and startups** that develop **innovative applications** in the **eHealth** domain using FIWARE technology
- Support SMEs and startups in translating their idea into **a field lab tested prototype**, while elaborating their **business plan** and **go-to-market strategy** through:
 - Business & technical **coaching, training** and **matchmaking** events
 - **Co-creation** with **end-users and field labs** to enhance the chances of **successful uptake and business**
 - Funding by grants up to **217.000€**, total amount of funding is 6.240.000€
 - **Matchmaking** events with investors, public funds, procurers etc

Process

18-month challenge, split in a three phase acceleration program

- 80 teams will enter the first phase with grant of 15 000€,
- 40 will continue with 50 000€, and
- 20 finalists entering the third and last phase will receive 152 000€

Call Submission

Open for applications:

Sept 15 – Oct 31, 2014 at 10 pm CET

The submission will be done via the F6S platform
