

Building Community Services with Amiona

Interactive Session on “Neighbourhoods of the Future”

AAL Forum 2016

Philipp Osl

St. Gallen, 28.09.2016

Facilitating access to existing services is the first step to establish a powerful infrastructure for community services

Amiona Marketplace is the highly flexible standard software solution for quickly setting up local service marketplaces

Based on an infrastructure that reduces administrative efforts related to the provision on services...

- ... service providers establish new offerings.

- ... additional community services can be realized with low efforts for the organizers.

- ... organizations can collaborate more efficiently.

For additional information on how Amiona can help you to establish great services in your neighbourhood...

The Amiona platform in a nutshell

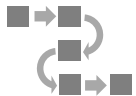

Device-independent thanks to HTML5 (responsive design)

Flexible catalogue structure to be defined by customer

User-specific favorites to further improve ease of use

Several appointment coordination processes

Clearly arranged calendar and messages view

Service execution confirmation (incl. modification of amounts and prices)

Dispatching of service requests between different employees

Integration with calendar systems (e.g. MS Outlook)

Optional integration with ERP systems
