SELF-MANAGEMENT OF PHYSICAL AND MENTAL FITNESS OF OLDER WORKERS

Do we need a dedicated startup accelerator in the AAL Programme?

The objective

- AAL Programme is aimed at creating innovative **products and services** (helping to tackle the ageing challenge)
 - It offers AAL2Business support to the projects
- but
- EC founded FIWARE initiative has come up with startup accelerators

 - Should we change anything in how we work within AAL Programme to bring the R+D results to the market?

Poznań Supercomputing and Networking Center

- Leading Polish R&D Center – part of the Polish Academy of Sciences – almost 300 ICT researchers
- Network operator (connecting over 700 research and public institutions)
- National Research and Education Network PIONIER – over 7000 km of own fibers, connection to GEANT
- Metropolitan Area Network – POZMAN
- HPC Center – on the TOP500 Supercomputers List
- Activities:
New Generation Networks, eLearning, Telemedicine, Videoconferencing, HPC, Grids & Clouds, Grand challenge applications, Data repositories, Digital Libraries Federation, New media and visualization technologies, Future Internet, FIWARE, Cyber Security, Network services.

PSNC – why do we organize this workshop?

1. We maintain (and develop) infrastructure for the research community in Poland
2. We conduct applied research – we have our own results
3. We have a business ecosystem around us (regional ICT cluster, spinoff, startup incubator, ...)
4. We have participated in both: (FIWARE) startup accelerators and AAL Programme

AAL Programme projects and their values

1. Verified prototype of a technological solution
2. Business model for selling the solution
3. AAL2Business services

Does this work? Is this enough?

Workshop formula

- Background
 - FIWARE accelerators (FICHe)
 - AAL2Business
- Examples
 - medVC (accelerated through FIWARE)
 - Fit4Work (AAL Programme ongoing project)
- Discussion
- Survey
